Hi Chuck,

As we discussed today, I've added a monitoring requirement for the entry point to well #1 in the case that you have to run the well. In 2018 if you run well #1 you will need to take an arsenic and a nitrate sample. For the rest of the chronic contaminants (inorganics, RADS, VOCs and SOCs) I've pushed that requirement to 2019. So if you run the well in 2019, you will have to sample for those contaminants. Let me know if you have questions. Thanks!

I've also attached the Polacca CCR per your request. Thanks.

Emmanuelle
